Office Action Summary

Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a process of smoothing a porous surface, classified in class 264, subclass 45.1.
 - II. Claims 14-18, drawn to a product with pores, classified in class 428, subclass 304.4.
 - III. Claims 19-21, drawn to a process of smoothing a surface, classified in class 156, subclass 307.1.
 - IV. Claims 22-26 are, drawn to a product with a coating that can be textured, classified in class 428, subclass 172.

1. This application contains two sets of product and processing. Groups I and II are drawn to smoothed porous materials while Groups III and IV are drawn to smoothed surfaces. These two sets are separate and distinct due to one containing the pores and the other not containing pores.

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as molding.

3. Inventions III and IV are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the

product as claimed can be made by a materially different process such as molding as double-sheet molding.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication should be directed to Ex. D Loney at telephone number 703 308-2416.
